National online webinar conducted on 12-11-2021 at 10.30 Am to 12.00 Noon in the principal chamber by department organised by department of physics and chemistry and Dr.L.Malleswarao acted as convener of Dr.G.Saliaja, department of chemistry acted as coordinator of this of the webinar Effects of Global warming and climate change.

### About the National webinar:

India is extremely vulnerable to the important of climate events. Every year it faces extreme weather events in the form of floods and cyclones, which take lives, destroy homes and agriculture yields and results in large revenue losses. The importance of the Ocean in climate regulation places it at the peak of climate change. one of the earliest and most noticeable changes detected as a result of recent global warming has been an increase in extreme weather events. Over the last half century, weather patterns become more variable with more frequent and more intense rainfall events.
